SUMMARY

I am a fresh graduate from the Computer Science program with a strong understanding of programming and web development. During my internship, I had the opportunity to develop a Python and XML-based ERP application. For my final project, I developed a machine learning-based project that compared several algorithms for detecting fraud on the Ethereum network. With this background, I am ready to contribute positively and continue learning new things to support the achievement of the company's goals.

WORK EXPERIENCE

Intern Programmer, PT. Jidoka System Indonesia   **May 2023 - June 2023**

- Developing ERP applications using Python and XML to support internal operational processes.
- Work together as a team to design and implement inventory and sales management modules.
- Actively participate in daily scrums and be involved in sprint planning as part of the Agile work process.

EDUCATION

University of Buana Perjuangan Karawang   **Karawang, Jawa Barat**

Bachelor of Computer Science   2021 - 2025
GPA 3.41/4.0

- Completing a final project focused on evaluating machine learning algorithms for detecting fraud on the Ethereum blockchain network.

CERTIFICATE

BNSP

Junior Web Developer Certification   June 2023 - June 2026

DICODING

Fundamentals of Data Science   November 2024 - November 2027

Basics of Structured Query Language (SQL)   November 2024 - November 2027

Basics of Python Programming   March 2025 - March 2028

Basics of Data Visualization   April 2025 - April 2028

Fundamentals of machine learning   May 2025 - May 2028

Hard Skill : Javascript, Typescript, React.js, Next.js, Express.js, Php, Laravel, Python, Docker, Git

Soft Skill : Problem Solving, Communication, Teamwork, Time Management, Adaptability
